

Instructions for printing birthday cards

This PDF file has been designed for reproduction on a high-quality, commercial printing press. To avoid costly mistakes, the file should be flight-checked (reviewed) and output for US Web Coated (SWOP) printing by a qualified pre-press professional. The digital files are provided as a free customer service of TG, which cannot be held responsible for errors in printing as a result of the use of these files.

Note that the customizable address information on the mailing side of the birthday card can be changed with Adobe Acrobat Professional software.

The digital file was created to meet PDF X1a standards.

- Trim size: 8.5" wide x 5.5" tall
- Postcard style / no folds
- 4-color process (CMYK) on two sides
- White glossy card stock recommended
